Abstract (en)
[origin: US4711069A] A stretch foil wrapping arrangement for wrapping objects. The objects are conveyed to a transition bridge around which a stretch foil tube is wrapped. As the objects are conveyed through the transition bridge they pass inside of the tube which is out after the object and tube portion in which it is wrapped leave the transition bridge. The transition bridge includes upper and lower conveyors each having an outer actively driven belt and an inner passively driven roller plane in contact with the objects.
