Abstract (en)
[origin: EP0141913A1] 1. Element for preventing the running down of growth medium such as soil or turf on inclined surfaces, said element including a frame structure formed from side walls (1), the outer surfaces of the side walls being inclined with respect to the plane of the frame structure, characterized in that the side walls (1) are hollow and open at their one edge and that the inner cavities of the side walls become wider towards the open edge of the side walls.
