Abstract (en)

[origin: EP0142064A2] 1. Calendar comprising a movable indicating strip (2) having a day marker, with the calendar sheets being held together by the indicating strip (2), wherein the day marker consists of a movable frame (5) which is held between two fold regions (3, 4) onto the indicating strip (2), said fold regions corresponding to the widths of the calendar (1), and further comprising a column with a number for each week printed onto the respective calendar sheet, characterised in that an additional frame (6) is provided on said indicating strip (2) between said fold regions (3, 4) said additional frame being stationary and aligned with the column containing the week numbering.
