Abstract (en)

New biologically active substances - called WS 7739 - having pharmacological activity are prepared by fermentation of a strain belonging to the genus *Streptomyces*, e.g. *Streptomyces phaeofaciens* subsp. *matsuenensis* no. 7739 FERM BP 660 in a nutrient medium containing sources of assimilable carbon and nitrogen under aerobic conditions; pharmaceutical compositions containing these substances as active ingredients are effective in treating diseases, such as asthma, thrombosis etc.
