Abstract (en)
1. Massage appliance for the massage by rolling of skin and reflex zones on the human body, the massage appliance (1) comprising a shaft (3) positioned on a handle (2) and having massage rings (4) mounted to be freely rotatable thereon, which rings are respectively provided with projections arranged uniformly distributed in the circumferential direction, characterised in that the projections are needle points and the handle (2) is constructed so as to have at least limited adjustability about a transverse joint (7, 8, 9, 10) from the axially aligned position and relatively to the shaft (3) on which the massage rings (4) are mounted.
