Abstract (en)

[origin: US4580200A] A light fixture is provided comprising a top elongated curved section and a matching bottom elongated curved section. The top section is fitted to the bottom section along their longitudinal edges and an elongated clip along the length of each edges holds the diffuser bottom section to the top reflector section. A seal is provided along the length of the clips to insure that the light fixture is impervious to dust or other undesirable contaminants. End sections join the top and bottom sections to form a closed light fixture.

Abstract (fr)

L'invention a pour objet un luminaire clos à tubes fluorescents composé notamment d'un corps (1), d'un diffuseur (2), et de deux pièces d'extrémités (3) ainsi que de moyens d'étanchéité (10,18) entre le corps, le diffuseur et les pièces d'extrémités. Les pièces d'extrémités portent les douilles (12,13) des tubes et facultativement, un dispositif d'amorçage (14).
