Abstract (en)

[origin: DE3316874A1] In the case of an identity card (10) comprised of an assembly of preferably four sheets (12, 14, 16, 18), in order to make an inscription on one of the inner sheets (14) by means of a fast printer, the area (22) concerned by the inscription may be removed. A sheet (16) adjacent of the inner sheet (14) has an adherence elemet (30) which enables an accurate reinsertion into the set of sheets. This adherence element (30) insures the inscription carrying coupon (22) and prevents it from being displaced during welding.
