Abstract (en)

A modular hammer and safety assembly (2), for a firearm, said assembly comprising a slide structure for connection to a firearm slide receiver assembly (16), an ejector mechanism, a hammer (26), a spring (34), biasing the hammer, a sear (40) for retaining the hammer in a cocked position, a disconnector assembly (46) operable to prevent actuation of the sear (40) during a cocking operation, and a safety device (62) selectively moveable to a position preventing firing of the firearm, the housing and the aforementioned components being interconnected such that the assembly may be withdrawn, or inserted into, a firearm as a unitary modular unit.
