Abstract (en)

[origin: EP0143193A2] 1. Stage structure which can be erected from separable structural elements, particularly as a large stage for open air events, with a podium (18) and, disposed laterally thereof, relevant bearer elements (4) by which a stage canopy (2) can be carried, characterised in that the lateral bearer elements (4) which can be assembled from scaffolding elements (12) comprise in each case at least one tower (11) and that between the towers (11) the stage canopy (2) can be fixed on lifting units (3) located on the towers (11) and by reason of which the stage canopy (2) can be adjusted in its height at will in the region between the towers (11).
