Abstract (en)

[origin: EP0143237A1] 1. A handle-mounting (2) for connecting-rod hardware of windows, doors or the like, having a griptype handle (9) supported to turn in a screw-on plate (3) and a slider (10) displaceable by the handle in the direction longitudinal to the screw-on plate (3) as the driving member of a slidably guided connecting-rod, where on both sides of the grip-type handle bearing (4) externally acutable locking members (23, 24) are provided, which in the zone of shift of the slider (10) have displaceable locking-noses (25) which are able to swivel with a close fit into locking openings (34, 35) in the wide side of the slider (10), characterized in that the locking members (23, 24) are designed as pivoting pins the locking-noses (25) of which, displaceable into the plane of shift of the slider (10), extend radially and which at their respective one endface (A) sunk behind the transverse sidefaces (12) of the screw-on plate (3) have faces (30) for engaging an adjusting-tool (31).
