Abstract (en)
[origin: EP0143712A1] 1. Flexible door comprising a frame (1) with two vertical guides (5) for a threshold bar (15) on which is fixed one of the ends of a flexible sheet (19) wound on a horizontal drum (13) supported by a stand (4) mounted at the upper end of the frame (1), the said drum being connected by a kinematic connection (8, 9, 10, 11) to a motor (7) for controlling its rotation in one or other direction for the purpose of closing and opening the door, characterised in that the flexible sheet is formed by a transparent sheet of polyvinyl chloride, the guides (5) comprising limit switches (39), one corresponding to the open position and the other to the closed position and cooperating with the threshold bar (15).
