Abstract (en)
[origin: WO8404907A1] According to the present invention, a lifting strip (5) is formed in the blank (A) so that parallel tearing lines (6, 7) extend through 3 adjacent wall segments (1, 3, 4) of the blank (A). Tearing lines (6, 7) end in a wall segment (3) at a jointing point (8). Said tearing lines (6, 7) delimit a lifting strip (5) which may be torn in the finished package and on which strip a pulling force may be exerted so as to bend it about the jointing point (8). Thereby, articles may be removed from the package by means of the lifting strip (5).
