Abstract (en)

[origin: US4595047A] A device for attaching an element for rotation in a tube comprises a conical sleeve, a hook and a link-pin. The link-pin interconnects the hook and the sleeve while permitting rotation of the hook. A particular application of the attachment device is to position an Archimedes' screw in the tubes of a multitubular heat exchanger, a steam condenser or the like. The assembly can be dismounted, if desired, and is adaptable to different tube diameters.

Abstract (fr)

Dispositif de fixation rotative d'un élément dans un tube comprenant un fourreau conique (1), un crochet (3) et un tube tourillon (2). Le tourillon solidarise en traction le crochet et le fourreau tout en autorisant la rotation du crochet. L'ensemble est démontable et adaptable à différents diamètres de tubes. Application à la mise en place de vis d'Archimède dans les tubes d'échangeurs de chaleur pluritubulaires, condenseur de vapeur ou autre.
