Abstract (en)
[origin: ES8606818A1] A cabin of an aerial cableway having a generally square shape and at least a door opening on the whole lateral wall. The door comprises two panels adapted to abut one another for closing the door opening and to move symmetrically away along a curved path towards the open position. In the open position each panel covers one half face of the end wall. An actuating mechanism includes link rods secured to the roof and to the floor of the cabin for guiding and moving symmetrically the door panels.

Abstract (fr)
Cabine (10) d'une installation de transport à câble aérien en forme de carré dont les deux faces latérales comportent chacune une porte à deux vantaux (26, 28; 30, 32) occupant toute la face. Lors de l'ouverture les vantaux se séparent et se rabattent respectivement sur la face avant (18) et la face arrière (20) de la cabine.
