Abstract (en)
[origin: EP0148081A2] Process for the preparation of mixtures containing 60 to 85% of ground coal, 15 to 40% of water and at least one additive. The additive is added progressively during the grinding of the coal. The quantity of additive at any time corresponds to the available specific surface. The coal-water mixtures prepared according to the invention are pumpable liquids which are easy to convey.
