Abstract (en)

1. Taxiway safety system for aerodromes, with taxiway centreline lighting and holding-point lighting that is formed by a stop bar (4) which is arranged transversely to the taxiway direction, and which can be switched on and off, in particular before the taxiway/runway junction, and with vehicle detectors (1, 2) that are sited adjacent to the stop bar (4), characterized in that a segment (5) of the taxiway centreline lighting is sited after the stop bar (4), in the taxiway direction, this being a segment which can be switched on and off separately, in that a sequential switching circuit is provided, which switches off the stop bar (4) and switches on the segment (5) of the taxiway centreline lighting once a clearance has been given, by manual means, to taxi into the takeoff start position, and in that once an aircraft has been detected by a vehicle detector (2) that is sited after the stop bar (4), the sequential switching circuit switches the stop bar (4) on again.

Abstract (de)

Bei einer Rollweg-Sicherungsanlage für Flughäfen, mit einer Rollweg-Mittellinien-Befeuerung und einer Rollhaltepunkt-Befeuerung, insbesondere vor der Einmündung des Rollwegs (6) in eine Start- und Landebahn wird die Rollweg-Befeuerung durch einen ein- und ausschaltbaren Stoppbalken (4) quer zur Rollweg-Richtung gebildet, wobei in Rollrichtung vor und hinter dem Stoppbalken (4) Fahrzeugdetektoren (1, 2) angeordnet sind.
