Abstract (en)

[origin: US4571378A] Improved photographic recording materials containing at least one silver halide emulsion layer with comparatively high sensitivity and at least one silver halide emulsion layer with comparatively low sensitivity. Color couplers and DIR compounds of differing reactivities are associated with these layers.

Abstract (de)

Verbesserte fotografische Aufzeichnungsmaterialien enthalten wenigstens eine Silberhalogenidemulsionsschicht vergleichsweise hoher und wenigstens eine Silberhalogenidemulsionsschicht vergleichsweise niedrigerer Empfindlichkeit. Diesen Schichten sind Farbkuppler und DIR-Verbindungen unterschiedlicher Reaktivität zugeordnet.
