Abstract (en)
[origin: EP0148739A2] The invention relates to a vehicle (1) for transporting a heavy mortar (7) carried by a stand (6) which is connected to hydraulic cylinders (2, 4) with the aid of which the stand is movable from a position on the vehicle to a position on the ground. To prevent recoil force from being transferred to the hydraulic cylinders, the stand is provided with a foot plate (12), taking up recoil force and being movable in the direction of the recoil force relative the rest of the stand.
