Abstract (en)

[origin: EP0150141A2] The invention relates to a complex panel comprising a frame and at least a filling panel with a rim. This panel is a multi-ply panel 1 comprising an inner ply 2 a fraction of the surface B'D' of which has been revealed by removal of the plies placed on top of this inner ply in order to form rims. The invention applies especially to the manufacture of door leaves. <IMAGE>
