Abstract (en)

1. Support for invalids'beds, in particular a stretcher support or treatment table in ambulances or the like, with pneumatic springing which optionally also permits vertical adjustment of the sprung support part, and also with a possibility for blocking the spring support part to render it vertically immovable, characterized in that the sprung support part (2) is connected with a rod part (12, 13') which executes a longitudinal displacement during sprung strokes of the sprung support part (2) and can be fixed relative to the non-sprung support part (21) or the floor by means of a pneumatically actuatable brake (17), which engage with its brake jaws (31) in chuck-like manner around the rod part (12, 23') which cooperates with it.

Abstract (de)

Das gefederte Teil (2) des Gestelles ist mittels eines Gestängeteiles (12) auf einem pneumatischen Federaggregat (10) abgestützt. Zur Blockierung der Federung kann das Gestängeteil mittels einer pneumatisch betätigten Bremse (17) festgestellt werden, welche das Gestängeteil (12) spannfutterartig umgreift.
