Abstract (en)
[origin: EP0150539A2] 1. Set of elements for packaging and securing rolls of sheet material (6) with varying diameters, consisting essentially of a surrounding carton (9) of a predetermined size, a base support (7) laid on the bottom of the surrounding carton, upper and lower securing means (1, 2) and also a number of sleeves (5) and a top support (8), characterized in that the securing means (1, 2) consist of individual bushings (1), rings or discs with holding pins (2), which means are formed so as to engage in a form-locking manner in the ends of the sleeves so that each sleeve (5) can be positioned and secured selectively, standing between the base support (7) and top support (8).
