Abstract (en)
[origin: EP0150651A1] A method of coloring selected hair shafts with a hair treating material, while leaving adjacent hair shafts untreated, in which hair treating material is laid down simultaneously onto a plurality of generally parallel spaced and non-overlapping areas (11-19) running along the lay of the hair; a method of touching up hair which has been so treated, after the roots have grown out; and a coloring comb (35) adapted to use in the method, said coloring comb having narrow dispensing gullets (75) separated by plural combing teeth (74).
