Abstract (en)

[origin: EP0150687A2] A vertically moving presser piston (26) presses the material on the bottom (3) of a compacting well (1); a pusher (5) operating at right angle through the well partially defines the said well wall, during the compacting and pressing operations, at the opposite side of a portion of a mobile gate-wall (9) and of a side channel (16) for the sliding of the pressed material and for its output and binding.
