Abstract (en)
[origin: US4632408A] A ski for the handicapped including a seating shell mounted on a mono-ski or a pair of parallel skis. The seating shell is mounted on either the mono-ski or the parallel skis. The seating shell includes at least one seating area and a longitudinally spaced leg supporting area. A tow and supporting bar assembly is provided which is pivotably mounted to the seating shell and engages, when desired, the ground. The tow and supporting bar assembly includes a tow bar holder which releasably engages with a T-bar device.
