Abstract (en)

A wet non-woven fabric having excellent drape characteristics, which is formed from a mixture of (A) a polyester short fiber in which a shrinkage factor in the direction of the fiber axis at a temperature not lower than 90 DEG C is negative and (B) a short fiber showing a fusion-bondability at a temperature lower by at least 50 DEG C than a temperature at which the short fiber (A) has a fusion bondability or (C) a polyester short fiber having a birefringence of 0.006 to 0.03, according to a wet paper-forming method.
