Abstract (en)  
[origin: US4605129A] A cylindrical container that has a lid with an opening for dispensing purposes as well as a piston-like base, which is pressed into the container in order to press out the contents of the container. The container body is wound from a flat, rectangular board blank and is closed by a longitudinal seam. Both ends of the body produced in this way are widened conically, in order to provide better sealing of the lid and base.
