Abstract (en)
[origin: EP0152147A2] Magnetic clamping device comprising in its basic embodiment two rectangular panels (1, 2) of flexible foil material, each having narrow strips (3, 4) of magnetic material embedded therein, the strips (3, 4) in each panel having alternately opposite polarities, the panels (1, 2) being locally attached to each other, such as along one of their edges, so that said strips (3, 4) extend substantially at right angles to said edge and so that with one of the panels (1, 2) lying flat on top of the other panel (1, 2) each strip (3, 4) of one panel (1, 2) lies directly opposite to a strip (3, 4) of the other panel (1, 2) having an opposite polarity.
