Abstract (en)

[origin: EP0152283A2] Apparatus for dispensing a beverage consisting of a fluid circuit having a flow pipe and a return pipe, cooling means for cooling the beverage, pump means for continuously circulating the beverage around the fluid circuit, one or more dispensing valves or taps in the fluid circuit through which the beverage is dispensed, and a reservoir for containing the beverage, said reservoir being connected to the apparatus by quick release coupling means to facilitate removal thereof. Where the beverage is to be formed of two or more liquids, a metering pump is provided to effect mixing of the beverage and the supply thereof to the reservoir. The reservoir may also be of the disposable collapsible type which is again provided with quick release coupling means to enable it to be removed from the apparatus.
