Abstract (en)

1. Palette trolley which supports, for storing and transporting purposes, two adjacent piles of stacked grouping trays, said trays having an overhanging skirting below the base and containing parallelepipedic packings, said palette trolley having a chassis consisting of two parallel longitudinal bars (10, 12) arranged at a distance (L2) of slightly less than the internal length (L1) of the trays ; the two bars being connected by a transverse joining member (14) in the central section (Z) of the chassis ; each bar having a break (20) in the middle forming two halfbars (101 , 102 , 121 , 122) on each side of said break ; each half-bar having a length (12) slightly smaller than the interior width (11) of the trays so that the half-bars (101 , 102 , 121 , 122) can engage in the overhanging skirting.

Abstract (fr)

Chariot-palette pour le stockage et le transport de plateaux de groupement superposés (P1, P1<'>) en deux piles adjacentes. Le châssis du chariot comporte, de chaque côté, deux demi-longerons (121, 122) présentant entre eux une interruption (20) permettant l'engagement des jupes (2, 2') qui font saillie en-dessous des fonds (32, 32') des plateaux (P1, P1<'>). L'invention permet un chargement stable des piles de plateaux chargés d'emballages (E5, E5<'>).
