Abstract (en)
[origin: EP0152538A2] The invention relates to a support (12) for roofing tiles (10) which is to be fastened on the eaves side to rafters (2), and proposes, for the purpose of optimum and homogeneous through- ventilation of the roof ventilated in the region of the roof ridge, that the support (12) be designed as a shaft open towards the supporting end (10') of the roofing tile (10), the top (13) of which shaft forms the supporting surface for the roofing tile (10) and the bottom (14) of which shaft faces the rafters (2), and which support (12) is designed labyrinth-like on the side of the shaft entrance. <IMAGE>
