Abstract (en)

[origin: US4597138A] A connecting member (1, 16, 20) consisting of at least two pivotably joined parts is suggested for the attachment of straps (2) to watches (3). In this arrangement, the mutually pivotable parts (6, 7; 17, 7; 21, 22) exhibit surfaces (14, 15) in contact with each other under spring pressure and having locking tabs and locking recesses, so that the parts (6, 7; 17, 7; 21, 22) of the connecting member (1, 16, 20) are releasably locked together at least after a pivoting by 180 DEG .

Abstract (de)

Zur Befestigung von Riemen (2) an Uhren (3) wird ein Anschlußteil (1, 16, 20) vorgeschlagen, der aus wenigstens zwei verschwenkbar miteinander verbundenen Teilen besteht. Dabei besitzen die gegeneinander verschwenkbaren Teile (6, 7; 17, 7; 21, 22) unter Federdruck aneinander anliegende Flächen (14, 15) mit Rastvorsprüngen und Rastausnehmungen, so daß die Teile (6, 7; 17, 7; 21, 22) des Anschlußteiles (1, 16, 20) wenigstens nach einer Verschwenkung um 180° lösbar verrastet sind.
