Abstract (en)

[origin: WO8500830A1] Secretion of human interleukine 1 is induced from human, lymphomatic leukemic cell lineages, of hematopoietic and lymphoid origin, which do not normally secrete interleukine 1, by means of an inductive agent selected among those which have the properties for inducing cell differentiation, particularly phorbols and phorbol-esters.

Abstract (fr)

On induit la sécrétion d'interleukine 1 humaine à partir de lignées leucémiques humaines, lymphomateuses, d'origine hématopoïétique et lymphoïde, ne sécrétant normalement pas l'interleukine 1, au moyen d'un inducteur choisi parmi ceux qui possèdent les propriétés d'induction de la différenciation cellulaire, notamment les phorbols et les phorbol-esters.
