Abstract (en)

Clamping device for clamping the end of a pressure plate to a pressure drum comprising a supporting fillet coupled with the drum and a clamping fillet fastened to the supporting fillet, a second clamping fillet being provided which together with the first clamping fillet rigidly fastened to the supporting fillet bounds a gap for receiving the end of the pressure plate to be clamped, whilst the second clamping fillet is movable transversely of its direction of length towards and from the first clamping fillet with the aid of a rod slidable in the direction of length of the second fillet, on which rod bears the side of the second clamping fillet remote from the first clamping fillet, whilst contacting faces of the slidable rod and the second clamping fillet are at an angle to the direction of displacement of the slidable rod.
