Abstract (en)

A metering dispenser cover of plastics or metal, for application to jars and containers of dense fluids or the like, as well as of generic flowable and incoherent powder products, comprising a substantially cylindrical, downwardly open cap body which has on its top face an aperture (12) for metering out the product of the jar or container, the aperture being selectively shut off by the end of a rocking lever (3) journaled to said body at an intermediate region thereof, and characterised in that from the bottom face of said lever there extends an articulation tab the free end of which is arranged to snap into a complementary seat formed in the top face of the body (14-15).
