Abstract (en)

[origin: EP0154949A2] Machine for fitting by clamping cable conductor ends (KE) of conductor sleeves (A) or other connection elements with a female connector opened or closed at the envelope surface, which may be clamped or compressed, particularly crimp contact elements, comprising a conductor sleeve supply unit (200), a cable conductor introduction unit (20), a stripping unit (50) for the cable conductor end by means of a stripping tool (51), a clamping/fitting unit (100) provided with a clamping tool (102) and with means for positioning the stripping and clamping tool with respect to the cable conductor end. Said machine is characterized by a pivoting drive (30) to pivot at least partially the stripping unit (50) and/or the clamping/fitting unit (100) in the fixed cable conductor introduction direction (20).
