Abstract (en)

[origin: EP0154957A2] The device comprises a pneumatic or hydraulic hammer (2) having a shank (8) where to a bracket (5) is secured. The bracket (5) carries a rotary disk toll bit (3) set for rotation in a plane transverse to the road course and has a ground contacting shoe (9) attached thereto. The hammer (2) is carried on a slide (10) including forward movement means (31).
