Abstract (en)

[origin: EP0155013A2] Method for coating substrates with fluorocarbons, characterised in that it consists in applying, at room temperature, with a gun, brush or roller, to the surface to be protected, an intimate mixture of fluorocarbon, with a specific grain size, with resins which solidify at room temperature, and serving as a matrix maintaining the fluorocarbon at the surface. The invention also relates to a product intended to be employed in the said process.
