Abstract (en)

[origin: EP0155243A2] One pair of profiles (6,11) form roof longitudinal traverses, one takes the longitudinal ends of the roof, the other takes the other roof end via an articulation (66) and defines a gutter and a facade guide. A second pair of profiles (7) connects to the first pair, engages the tops of the walls (2), and have a removable profile (12) taking the roof at the desired pitch. The third pair of profiles (5) form risers and have vertical guides (5a,5b) for the walls and the facade (3). Thermally insulating transparent panels (8) are connected to each other to define the roof.
