Abstract (en)

[origin: WO8500994A1] A method and apparatus for dispensing and dispersing dry, powdered lubricants and/or coloring, such that it completely coats granules of plastic to be lubricated and/or colored, by dispensing amounts of the coating material from a container (12) to a region from where a timed blast of air transports said coating material through a tube (8) communicating with the throat (34) of a hopper (35) containing said plastic granules, all being operated in a coordinated fashion which may be varied to increase or decrease rate and/or amount of delivery of the coating material.
