Abstract (en)
[origin: EP0155616A2] 1. Container having an outlet opening in connection with a spraymouth (15) joined with closable valve means, further having a cap (5) connectable with the container at the area of the outlet opening which is equipped with at least one rollermeans to apply sprayable liquids for body care on the skin connected to a sledge (8) to be slid into the direction of the outlet opening in order to apply a pressure to the liquid to be sprayed, characterised in that the cylindrical rollermeans (10) with its surface at least partially is positioned within the spraybeam and is made out of a substantially not elastic plastic-material, the surface having a multitude of cavities and/or elevations, further that the sledge (8) is formed tub-like, opening in the direction of the rollermeans (10) and that the spraymouth (15) is positioned at the bottom (14) of the tub parallel and in a distance to the rollermeans (10) and connected with its other side to the outlet opening.
