Abstract (en)

[origin: EP0155674A2] In a refrigeration apparatus with a door 1 arranged on the front side, there are in the cooling chamber on opposite side walls 2 support strips 4 which run towards a rear wall 3. A cold product shelf 5 is held displaceably in the support strips 2. In order to increase the utility, the cold product shelf 5 is designed as a transparent plastic panel. Its edge 8 turned towards the rear wall 3 is in this connection, at least over a part of its length, at a distance from the rear wall. <IMAGE>
