Abstract (en)

[origin: EP0156026A2] 1. A device (11) for holding a removable car top (3) on the ceiling (2) of a building (1), in particular a garage, characterized in that a vertically adjustable guide element (13) formed by at least two rigidly coupled bars (26, 27) holds a horizontally displaceable slide (12), into which a holding element (14), preferably arranged in vertical direction to the axis of the guide element (13), displaceably guided in the former and laterally connectable with the car top (3), and that the guide element (13) is held by means of a linkage (supporting arms 15, 16) in vertically adjustable position on the ceiling or roof (2) of the building (1).
