Abstract (en)

[origin: EP0156468A1] An apparatus for stretching a plastic film around a package includes two handles 15, 17 secured to the core 11 of the plastic film 12, one handle 15 effectively extending the core and having a braking cover for effecting tension control. The other handle 17 includes a U-shaped member to provide a second grip 19 parallel to, but displaced from the axial centerline of the core. The plastic film 12 is configured between the two handles 15 17 for rotation about the centerline axis of its core.
