Abstract (en)

The switch comprises a box (20) with electrical connections (21) and a projecting spindle (22) with a flat side (23). In front of the box is a printed circuit board (11) having a series of contact points linked to a series of conductors (13). A brush carrier (15) fits between the switch spindle (22) and the operating button (6A) to move a contact brush (14) over the conductive pads. The brush carrier rotates with a spring detent mechanism (30,31) acting against notches (19) in its edge. The conductors are linked to individual sections of a fluorescent light display, or to a series of individual indicator lamps to show the operating condition of the cooker.

Abstract (fr)

Dispositif d'affichage des séquences ou de la température d'un appareil de cuisson muni sur sa face avant d'un bandeau (1) comportant un bouton de commande des séquences manoeuvrant un commutateur de puissance et/ou un bouton de commande de la température manoeuvrant un commutateur thermostatique, caractérisé en ce qu'il comporte un afficheur (2, 3) à secteurs (2', 3') munis de raies. Application aux appareils de cuisson domestiques.
