Abstract (en)

[origin: EP0156955A1] 1. A cleaning device, in particular for small-bore tubes, with a high-pressure hose (6) which is driven rotationally about its axis and which has at least one nozzle (8) at its front end for the discharge of the cleaning fluid, the high-pressure hose (6) being guided in a non-rotatable protection hose (5), one end of which is connectable to the tube (7), characterized in that the protection hose (5) is non-rotatably connected to a device (4) for producing a thrust, and in that between the drive (1) and the device (4) is disposed a large-bore high-pressure hose (3) which extends into the protection hose (5) and is joined there to the small-bore high-pressure hose (6).
