Abstract (en)

A plate, sheet or film material having a hydrophobic resin or glass surface coated with a subbing layer promoting the adherence thereto of a layer containing a hydrophilic colloid, characterized in that said subbing layer is essentially free from synthetic organic polymer and comprises: (1) from 35 to 75% by weight of colloidal silica, (2) from 25 to 65% by weight of an aromatic hydroxy compound that can be applied from an aqueous medium in dissolved form, and (3) from 0 to 15% by weight of a proteinaceous hydrophilic colloid.
