Abstract (en)
[origin: EP0157289A2] 1. Electric panel-mounted fuse-holder (1) for fuse inserts with terminal contact caps having an inner component (3) rockable in a holder casing (2) wherein the fuse insert may be inserted by means of a mounting (4), having an actuating handle (5) wherewith the inner component (3) can be rocked into the on or off position respectively, provision being made for cooperating contacts (6, 7) fixed to the casing acting in the on position on the terminal contact caps, which contacts either act directly on the terminal contact caps through lateral openings of the rockable inner component (3) or act indirectly on the terminal contact caps via auxiliary contacts mounted in the rockable inner component (3), characterised in that an arresting device (10) is arranged in the casing (2) of the fuse insert cooperating with the rockable inner component (3), whose arresting component (11) is latched with the rockable inner component (3) when the mounting (4) is pulled out and which can be disengaged from the rockable inner component (3) by the complete insertion of the mounting (4).
