Abstract (en)
[origin: EP0158016A1] 1. Cupboard consisting of detachably interconnected parts and having sections (1) used to connect edges and to carry mountings (10, 11, 12), said cupboard incorporating a combination of the following features : - the sections are hollow profile sections (1) ; - a tab (2) presenting a barbed profile juts out beyond a narrow wall of the hollow profile section (1), the hollow profile sections (1) being connected by means of said tab (2) to a wall portion having a longitudinal groove and in contact with the narrow wall over a large area ; - a longitudinal groove (5) is hollowed in the narrow face of the hollow profile sections (1) opposing the narrow wall presenting the barbed tab (2) ; - a longitudinally extending, straight row of holes (3) is provided on one broad wal of the hollow profile sections (1) ; - a longitudinal groove (4) spaced apart from the row of holes (3) is additionally hollowed in the broad wall presenting the row of holes (3) ; - the mountings (10, 11, 12) have double-bend hook-type tabs (111) which engage in holes of the row of holes (3) (Figs. 6-8) ; - locking elements (14) fastening the mountings (10, 11, 12) to the hollow profile sections (1) are provided which engage in undercuts of the longitudinal groove (4) hollowed in the broad wall.
