Abstract (en)

[origin: EP0158143A1] 1. Chain element of variable length, in particular for jewellery chains, with two chain members extending in the longitudinal direction of the chain, where the first chain member (1) has a recess (3) on both sides extending in the longitudinal direction, in which the second chain member (2) is guided in longitudinal movement, characterized in that the chain members can be held in several positions relative to one another through form closure or friction closure.
