Abstract (en)
[origin: WO8501199A1] A cup holder of the kind having two protruding flexible arms (2, 2') for retaining a disposable cup (3) is designed with a supporting surface (7) at the underside of the arms (2, 2'). There is hereby obtained a very simple structure, preferably made of single-curved surfaces, which is low-cost in manufacture.

Abstract (fr)
Un porte-gobelet comportant deux bras flexibles faisant saillie (2, 2') pour retenir un gobelet jetable (3) est doté d'une surface de support (7) sur le côté inférieur des bras (2, 2'). On obtient ainsi une structure très simple, de préférence à base de surfaces à courbe unique, dont la fabrication est bon marché.
